

Management Performance: Ene 23 Energy consumption reporting

Credits

No Minimum
Standard

Aim

To minimise operational energy consumption and the associated carbon emissions by encouraging measurement against energy performance targets and by increasing the awareness and understanding of energy consumption amongst building managers and users.

Question

What happens to asset energy consumption data?

Credits	Answer	Select a single answer option
0	A.	Question not answered.
0	B.	Asset energy consumption data not collected.
2	C.	Asset energy consumption data collected and compared against asset targets.
3	D.	Asset energy consumption data collected and compared against asset targets and reported on internally.
4	E.	Asset energy consumption data collected and compared against asset targets and reported on internally and published in an annual public report.

Assessment criteria

Criterion	Assessment criteria	Applicable Answer
1.	Answer option D has been selected in Man 04 Environmental policies and procedures and all relevant Assessment Criteria have been met.	C – E
2.	Asset energy consumption should be monitored, targeted and reported to the appropriate level within the building occupants' organisational structure	C – E

Evidence

Criteria	Evidence requirement
-	The evidence below is not exhaustive, please also refer to the 'BREEAM evidential requirements' section in the scope of the Guidance for appropriate evidence types which can be used to demonstrate compliance.
All	Records of energy consumption analysis, such as spreadsheets, summary reports etc.
All	Copies of documents showing energy consumption and analysis that have been reported internally.
All	Copies of documents showing energy consumption and analysis that have been reported publicly.
2	Total energy consumption should be reported by meaningful segmentation, for example by portfolio, fund, geographic location, or asset type.
